DETAILED ACTION

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).
4. Claims 1-17, 19-28 are rejected under 35 U.S.C. 102(e) as anticipated by or, in the alternative, under 35 U.S.C. 103(c) as obvious over claims 1-17, 19-28 of U.S. Patent 6,598,923.

Art Unit: 3612

The claims of the patent differ only in the use of flash welding, the patent claims being silent as to the process used. Process claims are not given patentable weight in a product claim MPEP 2113, however this is an admitted known technique as evidenced by applicant's specification, rendering even the process not a patentable distinction.

See MPEP 706.02 (1)(2) to establish common ownership *at the time the invention was made* in order to overcome this rejection.

Applicant's statement in this regard is noted. However, the statute requires a statement **at the time the invention was made** as listed in the MPEP citation. The rejection must be repeated as a result.

Allowable Subject Matter

5. Claim 18 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

6. Claims 29-35 are allowed.

Response to Arguments

7. Applicant's arguments filed 5/31/2005 have been fully considered but they are not persuasive. Please see the response above. In view of the incorrect listing of 35 USC 103(a) instead of 103(c), this action is not made final in order to allow applicant additional time to overcome the rejection as stated in MPEP 706.02 (1)(2).
